Mission Statement

The mission of the Harvard Museums of Science & Culture (HMSC) is to foster curiosity and a spirit of discovery in visitors of all ages, enhancing public understanding of and appreciation for the natural world, science, and human cultures. HMSC works in concert with Harvard faculty, museum curators, and students, as well as with members of the extended Harvard community, to provide interdisciplinary exhibitions, events and lectures, and educational programs for students, teachers, and the general public. HMSC draws primarily upon the extensive collections of the member museums and the research of their faculty and curators.
